Experienced Frontend Software Engineer with 5+ years delivering top-notch web apps, excelling in user-centric design and pragmatic solutions. Expert in modern technologies, merging UX with scalability for impactful, visually captivating software.

PROFESSIONAL EXPERIENCE

Sauce Labs

Frontend Software Engineer

San Francisco, CA

August 2022–Present

- Responsible for maintaining and enhancing the frontend codebase written in ReasonML, employing ReasonReact, Parcel, and Emotion CSS for a type-safe and efficient development process.
- Proudly led the frontend implementation of the "Workflow Integration" project, enabling seamless integration of Jira and Slack with our application, enhancing customer workflows.
- Implemented automated testing processes, reducing the number of critical bugs by 30% and improving overall code quality.
- Collaborated extensively with cross-functional teams, actively mentoring junior engineers, and fostering teamwork between frontend and backend development for successful project delivery.

Own A Car

Jr. Full Stack Developer

Fresno, CA

Jan 2018–July 2022

- Spearheaded the development and maintenance of internal software applications aimed at enhancing productivity and gathering vital data on customer traffic, sales team performance, and vehicle inventory logistics.
- Developed an inventory tracking application that boosted inventory tasks efficiency by 50%, utilizing React, PHP, and MySQL for frontend, backend, and database components, respectively.
- Created a user-friendly dealership website with advanced features, including data display, pagination, and form validation, using React, CSS, PHP, and MySQL for frontend, styling, backend, and data storage.
